**DRILL BIT SETS  
BLACK OXIDE COATING**

48892802

These Drill Bit Sets offer convenience and heavy-duty performance on the jobsite. Milwaukee Black Oxide drill bits are designed for extreme durability and long life. The web features a thicker core than a standard drill bit to provide ultimate strength and protect against side-load breakage. A specially designed parabolic flute form clears chips and debris fast to keep the bit cool. A precision start, 135 Split Point tip starts on contact to keep the bit from walking for fast accurate holes. Excellent for drilling on curved surfaces, requires less effort to drill and is highly recommended for use with portable drills. The 3-Flat Secure-Grip shank won't slip in the drill chuck. Reduced shank diameter for use in 3/8" chucks.

**48892803**

The set comes in a resilient case and includes bit sizes 1/16", 5/64", 3/32", 7/64", 1/8", 9/64", 5/32", 11/64", 3/16", 13/64", 7/32", 1/4", 9/32", 5/16", and 3/8".

**EXACT™ KNOCK-OUT PUNCHES AND DIES**

Punch

Die

EXACT™ punches and dies have innovative features which bring value for the contractor. Heavy duty, they can punch holes in both mild and stainless steel material. Engraved crosshairs on the dies deliver clearest alignment with pre-drawn crosshairs. Both the tooth geometry of the punches, and slug removal ports on the dies, provide optimal slug removal. Large size ID markings on both the punches and dies permit easy punch and die selection. EXACT™ punches and dies do not require spacers.

**INKZALL® MARKER**

INKZALL Jobsite Markers feature clog resistant tips and the ability to write through dusty, wet or oily surfaces. The durable marker tips are designed for writing on rough surfaces such as OSB, cinder block and concrete and the ink dries quickly to reduce smearing markings, without drying out quickly when the cap is left off. For added user convenience, the INKZALL markers have a built-in hard hat clip for easy storage and access.

## Fluke Offers Designs for Everyday Use

Fluke meters and testers are designed to help you do your job faster, more efficiently and with greater accuracy, there is a model for every budget and application.

### Infrared Thermometers

Infrared Thermometers are non-contact meters that allow you to find hotspots, locate grounds in circuits, spot energy loss sources, measure temperature from a safe distance or locate wire damage. Their applications are endless and they are an essential tool in today's electrical testing world.

### Digital Multimeters

Fluke digital multimeters are built to troubleshoot and repair electrical, electronic and HVAC systems. Professional technicians rely on these professional meters because of their high degree of accuracy and durability. Find a wide selection of these meters to fit your application.

### Clamp Meters

Fluke Clamp Meters allow plant maintenance and electrical professionals to take reliable readings in tight compact spaces. Used in commercial and residential applications, these meters can perform in the toughest environments while you diagnose and troubleshoot electrical problems.

### Insulation Testers

Keep your power systems running smoothly with Fluke insulation testers. Electrical construction and maintenance professionals can use these testers to troubleshoot and add to their preventive maintenance program.

## FIRE BARRIER SEALANT

FD150+RED

FD150+RED(200Z)

3M™ Fire Barrier Sealant FD 150+ is an economical alternative to firestopping applications. It is used to firestop metal pipes or cables through concrete or gypsum, and for use in dynamic head-of-wall systems. A single-part, sag-resistant, water-based acrylic latex sealant, 3M Fire Barrier Sealant FD 150+ has excellent adhesion characteristics to most common construction materials. And, since it dries to the touch within one hour, it can be painted for a more professional-looking job.

## FIRE PROTECTION PRODUCTS

66366

66367

### 66335

Metacaulk® Putty Pads are used to maintain the hourly rating of fire-rated walls containing electrical outlet boxes and to reduce sound transmission. Only one pad thickness (1/8 inch) is required for a 1 or 2 hour fire rating. No additional putty material needed to plug the end of each electrical metallic tube or conduit at its connection to the box. Hand moldable with no curing time required. STC rating 60. Tested in a UL 411 wall assembly/section to ASTM E90.

### 66366 and 66367

Metacaulk® Box Guard™ is a highly intumescent, fire-rated pad for use in electrical boxes. For steel electrical box membrane penetration applications, it is inserted on the inside back wall of an electrical box. When exposed to fire, Box Guard™ will expand forming a char that will seal off the opening and prevent the spread of flames and limit the temperature rise on the unexposed surfaces. A labor saving, economical alternative to putty pads. Great for retrofit jobs. STC 53 Rating. Tested in a UL 411 wall assembly/section to ASTM E90

### EASY-TWIST™ WIRE CONNECTORS

#### WINGED

Square wire spring provides secure gripping of conductors. Flame retardant thermoplastic shell provides excellent electrical insulation. The compact design ensures proper installation, especially in tight spaces.
