Introducing Klein Tools New Offset and Bulldog Aviation Snips

Offset aviation snips are the tradesman's choice for cutting sheet metal. They easily cut sheet metal on the curve without binding, and they keep the user's hand above and away from the metal. **Bulldog aviation snips** are great for short notch cuts in thick or multiple thicknesses of sheet metal, like rolled seams and S-cleats. No matter which version you choose, Klein's new aviation snips have high quality features for long-lasting performance.

Features

Offset blades keep user's hand above material being cut and flow material away from the blades. (Available only on Cat. Nos. 2100L, 2101R, and 2102S.)

Meets or exceeds ANSI/ASME quality standard B107.16M.

Spring-loaded for self-opening action.

Handle contour and maximum 5.5" (139.7 mm) opening provide easier gripping and strong cutting pressure.

Pictured: 2100L

Forged and heat treated steel blades for strength and durability.

Blade adjustment bolt for easy readjustments.

Closure latch for blade protection.

Heavy gauge steel handles for extra strength.

Textured, comfort grips are color-coded by cutting pattern.

Handy hang hole.

Capacities:

- Offset blades – cut 18 gauge cold-rolled sheet metal and 22 gauge stainless steel sheet metal.
- Bulldog/Notch blades – notch or trim 16 gauge cold-rolled sheet metal and 18 gauge stainless steel sheet metal.

⚠ WARNINGS:

- Always wear approved eye protection.
- Never use on or near live electrical circuits.
