Non-metallic whips are a valuable option for work requiring shor cable lengths. Whips are pre-cut lengths of non-metallic conduit 4 or 6ft long, that are pre-wired, supplied with 12-inch leads for termination, and provided with the appropriate connector on each end, reducing time on the job site. They are great for running power to air conditioning hookups, outdoor lighting, and other outdoor applications such as a disconnect for Jacuzzi or pool filter motors.
