

#### Conduits: directions for use

Below are a few short extracts taken from the relevant prescriptions.

VDE 0113/12.73

Metal tubing, pipes and conduits must be used in accordance with the prescribed safety standard.

Paragraph 10.3.1 states that all conduits must be designed to protect against the expected demands made on the product. This is to say, for example, that cable can only be fed through conduit if it is suitably protected from liquids, dust (IP-Protection) and other foreign substances.

Surfaces with which the laid conduits come into contact - such as edges, threads etc. should not damage the insulation of the conduit.

#### Fittings: directions for use

Conduits and fitting assemblies must be installed in accordance with VDE 0113.

It is not adequate just to feed the conduit into a housing. The conduit must be installed using a lock nut and fitting, which ensure a good electrical connection between the conduit and housing. The conduit must not reduce the protective capability of the housing. In order to ensure the effective installation of the conduit, it is important not only to use a suitable conduit but also to use the appropriate type of fitting. (see IEC-204)

#### Specifications

Shureseal™ fittings and conduits satisfy the following specifications:

- for heavy industrial applications in accordance with DIN 49012.
- according to IP67 rating
- according to DIN/VDE 0650, section, 2.1.1b
- according to BS731, part 1
- and have the necessary approvals (UL/CSA and VDE)

#### Installation

Installation is simple. The fitting screws easily onto the conduit, without the need for special tools. The fitting can be removed and re-used again at any time. The fitting also performs excellently against severe vibration. The conduit is not deformed by the fitting. In tests, the fittings have been shown to be extremely secure and guarantee a high level of security and reliability.

**Flexible metallic liquidtight conduits****Type TBEF - universal**

- TBEF (now integrating the TBHT grade) conduit with heavy duty double interlocked / single interlocked (with packing) galvanised steel core
- Universal conduit for all liquidtight applications requiring good mechanical strength and flexibility: machinery, conveyors, etc.
- Cotton packing for high flexibility (up to 1 1/4")
- High performance acid and oil resistant, self-extinguishing PVC jacket
- High mechanical stability
- Tested and certified in accordance with DIN VDE 0605:1982-04 (File Nr: 24058-5410-0050 / 32CRB F41 / LR, Document Nr.: 131354)
- Marked lengths (every 1 m) for quick and easy measuring and cutting

Length marking

1/4" - 1 1/4"

1 1/2" - 4"

**Technical Information**

Outer jacket	PVC, self-extinguishing
Core	Galvanised steel
Packing	Cotton (up to 1 1/4")
Colour	Black or grey**
Temperature range	Static: -25°C to +105°C Flexing: -5°C to +105°C
Voltage breakdown (flash test)	> 2 kV
Insulation resistance	> 100 MOhm
System IP rating	IP67, when correctly installed with T&B liquidtight fittings

## Flexible metallic liquidtight conduits Type TBDL - dual listed UL & CSA

- Type TBDL with UL / CSA approval, heavy duty double interlocked / single interlocked galvanised steel core
- Export and North-America oriented applications: multi-national projects, power plant, ...
- Copper wire packing for improved grounding (up to 1 1/4")
- High performance, acid- and oil-resistant PVC jacket, self-extinguishing in accordance with UL360
- Extremely high mechanical stability
- Marked lengths (every 1 m) for simple measuring and cutting
- Silicone free

## Flexible metallic liquidtight conduits Type TBEHC - extreme heat/cold

- Applications at extreme temperatures: refrigeration, transportation, industrial HVAC, heavy industries
- Very high tolerance to extreme changes in temperature
- Heavy duty double interlocked / single interlocked (with packing) galvanised steel core
- Cotton packing for high flexibility (up to 1 1/4")
- High performance acid- and oil-resistant Polyester jacket, self-extinguishing according to UL 94 V-2
- High mechanical stability in accordance with DIN 49 012
- Marked lengths (every 1m) for quick and easy measuring and cutting

Special fittings (HT series) rated at 150°C are now available for high temperature applications - please contact your Sales Office for product availability

## Flexible metallic liquidtight conduits Type TBZH - zero halogen

- Halogen free and low smoke outer jacket
- Ideal for applications where human lives can be a concern: public transportation, metro, train,...
- Heavy duty double interlocked / single interlocked (with packing) galvanised steel core
- Cotton packing for high flexibility (up to 1 1/4")
- High performance acid- and oil-resistant Olefin outer jacket, self-extinguishing within 30 seconds
- For use in safety areas (tunnels, public areas and transportation equipment)
- Marked lengths (every 1m) for quick and easy measuring and cutting
- NFF16-101 / NFF16-102 tested: I index = I3 (oxygen index = 40.7), F index = F1

## Flexible non-metallic liquidtight conduits Type LNMP - smooth outer surface

- UL and CSA approved
- Double layer construction offers a high level of mechanical stability for plastic tubing
- The Nylon lining between the 2 layers ensures a high level of flexibility
- High performance, durable acid- and oil resistant PVC outer jacket
- Perfectly designed for fittings which have to be safe, secure and electrically insulated
- Marked in lengths of 1 foot / 30.48 cm for quick and easy measuring and cutting
- High retention assured when used in association with T&B special fittings (Product Ref. 37XX and 63XX) (see pages 247 and 248)

## Flexible non-metallic liquidtight conduits Type EFC - with strengthened inner coil

- Highly flexible, liquidtight plastic tubing with strengthened inner coil
- UV-resistant and weatherproof
- High chemical resistance
- UL recognised under File No. E 96548
- CSA approved File No. LL 067241
- Crush-resistant due to stiffening effects of strengthened inner coil
- The ultra-smooth inner surface ensures that cables and conductors can be fed through very easily
- Can be used with plastic or metallic T&B "Bullet" fittings (see pages 249 to 253)

### Technical Information

Material	PVC
Colour	Black or orange* or blue*
Temperature range	-18°C to +75°C (CSA) -18°C to +60°C (UL)
System IP rating	IP65, when correctly installed with T&B liquidtight fittings

\* Add suffix -1 for orange, -2 for blue to Product Ref. (e.g. EFC025-1 for orange conduit)

## Material specifications

This chart gives an indication of the capabilities of the Shureseal™ liquidtight flexible metallic conduits. It is extremely difficult to provide data on all possible combinations or conditions that can occur.

Therefore it is recommended that this information should be used as a guideline and that the conduit should be tested in the intended application by the user, to determine suitability. If you have specific requirements, please contact Technical Support.

## Liquidtight fittings for flexible metallic conduits

### Product description

A standard fitting assembly is made of 4 pieces:

1. A screw body with a nylon throat on the connection side
2. The ground cone
3. The patented Nylon sealing ring
4. A gland nut

In addition, a locknut is supplied with the fittings with NPT thread.

### Product description

When correctly installed, the Shureseal™ fittings produce a positive seal against oil, liquids, moisture and dust.

The main features of the assembly include:

- a high resistance to conduit pull-off and a great resistance to vibration from machines
- an excellent earth continuity
- simplicity of installation: ability to install quickly by hand (or with standard spanners or wrenches, but no special tools are needed)
- the fittings will not damage or distort the flexible conduit.
- the nylon throat bush makes it easier to pull wires through without risk of damage.
- the fittings have a rugged construction and can be disconnected and reused.
- available with N.P.T., Imperial, P.G. and metric (I.S.O.) threads
- excellent IP ratings

The patented ground cone design offers the following advantages:

- it compresses the metallic convolutions of the conduit, providing a high quality ground contact with low impedance and a high conduit pull-off resistance
- the single helical thread on the ground cone is easy to install without cross threading
- it tolerates variations in conduit diameters and convolution pitch
- its rolled-over edge protects the conductors

The patented sealing ring design has the following exclusive features:

- it grips and seals the conduit without damaging the conduit jacket
- its symmetrical shape assures a foolproof assembly
- it ensures a positive seal against oils, liquids, moisture and dust

The range of fittings includes 5 different styles:

- straight version
- 45° version
- 90° version
- "Chase" = compact version for confined spaces, behind panels and boxes
- "Female Hub" version, for connecting flexible conduit direct to rigid conduit and flexible conduits

### Approvals

- C.E.G.B. approved (UK)
- UL listed Liquidtight File No E 23018
- ISO threads per BS 4568
- PG threads per DIN 40430
- Canadian Standard Association:  
File No. 002884, File No. LR 052391, File No. LR 82069

### Easy assembly without the requirement of any special tooling

1. Slide the gland nut and the sealing ring onto the conduit

2. Screw the ground cone into the conduit (between the convolutions) as far as possible

3. Screw the body and the gland nut together and tighten

The Thomas & Betts fittings are available in four different thread forms: NPT (National Pipe Taper), PG (Panzergewinde), Imperial and metric (I.S.O.).

NPT and PG threads have different contours (fig. 1 & 2). However a fitting with a male NPT thread (up to 2 inches) can easily be screwed into a part with a female PG thread (see table of compatibility for correspondences)

Fig 1. NPT thread according to USAS B2.1

Fig 2. PG thread according to DIN 40 430

### Table of compatibility

NPT MALE THREAD SIZE [inch]	MAX. OUTER DIAMETER D2 (ON NPT MALE THREAD) [mm]	MIN. CORE DIAMETER D1 (ON PG FEMALE THREAD) [mm]	CORRESPONDING PG FEMALE THREAD SIZE
3/8	16.66	→ 17.26	PG 11
3/8	16.66	→ 19.06	PG 13.5
1/2	20.96	→ 21.16	PG 16
3/4	26.44	→ 26.78	PG 21
1	33.25	→ 35.48	PG 29
1 1/4	41.91	→ 45.48	PG 36
1 1/2	47.80	→ 52.48	PG 42
2	59.61	→ 57.78	PG 48

### Liquidtight fittings for flexible metallic conduits

#### General information

#### Technical Information

Conduit type	Shureseal™ flexible metallic conduit
Style	Straight, 90° and 45°
Thread	NPT, Metric (I.S.O.), PG and Imperial
IP rating	IP67
Material	Galvanised steel chromate finish
Inner sleeve and sealing ring	Polyamide
Colour	Metallic

Special fittings (HT series) rated at 150°C are now available for high temperature applications - please contact your Sales Office for product availability

# Shureseal™

Liquidtight fittings for flexible metallic conduits

## "Chase" fittings, straight or right-angled

- High-performance fittings for Shureseal™ liquidtight conduits
- Special compact version (CHASE) for space-saving assembly, thanks to the male nipple (supplied with the fitting) that can be screwed into the female thread of the body
- Safe and effective installation without any efforts
- The fitting is composed of 6 parts: the threaded body, the steel ground cone, the nylon sealing ring, the gland nut, the sealing washer and a male nipple, ensuring an easy assembly without the need for specific tools
- The steel ground cone which is screwed into the conduit ensures an excellent earthing continuity and pull-off strength, as well as a very good resistance against vibrations
- Re-useable and independent replacement parts

## Technical Information

Conduit type	Shureseal™ flexible metallic conduit
Style/thread	Straight or right angled, NPT threads
System IP rating	IP67
Material	Zinc plated steel
Insulation throat and sealing ring	Polyamide
Colour	Metallic

## Liquidtight fittings for flexible metallic conduits

### Female hub and adaptor fittings

- High-performance special type fittings for Shureseal™ Liquidtight conduit
- **Special type hub fitting** with female (internal) thread for connecting flexible conduits to rigid conduits or for connecting 2 flexible conduits together (using male fittings)
- **Special type adaptor fitting** with female (internal) thread for connecting flexible conduits to AN-MS connector shells (such as MIL-C-5015 connectors and accessories)
- Safe and effective installation without any efforts
- The fitting is composed of 4 parts: the threaded body, the zinc plated steel ground cone, the nylon sealing ring and the gland nut ensuring an easy assembly without the need for specific tools
- The steel ground cone which is screwed into the conduit ensures an excellent earthing continuity and pull-off strength, as well as a very good resistance against vibrations
- Re-useable and independent replacement parts

# Shureseal™

Liquidtight fittings for non-metallic conduits

## Type LNMP - metallic fittings

- Easy installation
- Inner polyamide sleeve for protection of conductors
- Liquid- and dust-tight in accordance with IP66
- High mechanical stability (high retention)
- Supplied with locknut and sealing washer

4.2

## Liquidtight fittings for non-metallic conduits

## Type LNMP - plastic fittings

- Easy installation
- High strength, chemical resistant, non-burning, non dripping thermoplastic construction
- Smooth insulated body throughout for maximum dielectric strength
- Ideal for corrosion resistant applications
- Liquid- and dust-tight in accordance with IP66
- Serrated design provides high mechanical pullout strength
- Supplied with steel locknut and sealing 'O' ring

## Technical Information

Conduit type	Shureseal™ conduit type LNMP
Style/thread	Straight, 90°
System IP rating	IP66
Material	Body: thermoplastic Gland nut: thermoplastic 'O' Ring: Neoprene Locknut: Steel, case hardened and zinc plated

## Liquidtight fittings for non-metallic conduits

### Type EFC - plastic Bullet fittings

- Liquid-tight, dust-tight and oil-resistant
- Thomas & Betts patented quick connecting feature designed to prevent unlocking
- The spiral-shaped EFC conduit coil locks into fitting
- No loose pieces - secure against vibration
- Supplied with sealing washer (O ring)
- Fittings with NPT threads are supplied with locknut

### Technical Information

Conduit type	Shureseal™ conduit type EFC
Style/thread	Straight, 45°, 90°, NPT and metric (I.S.O.) threads
IP rating	IP65
Material	UV-resistant thermoplastic
Locknut	Zinc plated steel
Sealing washer	Nitril
Colour	Black
Temperature range	-45°C to +105°C
Flammability rating	Self-extinguishing according to UL 94 V-2

## Liquidtight fittings for non-metallic conduits

### Type EFC - metallic Bullet fittings

- Metallic fitting, designed for type EFC flexible plastic conduit
- Liquid-tight, dust-tight and oil-resistant
- Robust construction, ideal for demanding applications like in the railway industry (can be used with other kind of conduits and hoses commonly used in the railway industry, such as textile inserted rubber hoses,...)
- Liquid-tight, dust-tight and oil-resistant
- Thomas & Betts patented quick connecting feature designed to prevent unlocking
- Separate rotating attachment for easy fitting of conduit
- Spiral-shaped EFC conduit coil locks into fitting
- No loose pieces - secure against vibration
- Delivered with locknut

## Liquidtight fittings for non-metallic conduits

### Type EFC - metallic Bullet, Chase version

- Metallic fitting, designed for type EFC flexible plastic conduit Special version (Chase) for space saving assembly, thanks to the male nipple that can be screwed into the female thread of the body
- Liquid-tight, dust-tight and oil-resistant
- Robust construction, ideal for demanding applications like in the railway industry (can be used with other kind of conduits and hoses commonly used in the railway industry, such as textile inserted rubber hoses,...)
- Spiral-shaped EFC conduit coil locks into fitting
- The fitting is composed of 5 components: nipple with insulation throat, o-ring, body, insert and gland nut (Product Ref. LT6275MI also includes an additional sleeve)

### Technical Information

## Replacements parts for liquidtight metallic fittings

If after some time the fitting is released and needs to be re-secured, the seal and the ground cone should be replaced.

The following accessories are appropriate for all the standard liquidtight Shureseal™ fittings for metallic conduits:

- **Steel ground cone:** it provides a high quality ground contact with low impedance and high conduit pull-off resistance. The single helical thread on ground cone is easy to install by hand without cross threading. It tolerates variations in conduit diameters and convolution pitch. Its rolled-over edge protects the conductors. Manufactured in zinc plated steel.
- **Sealing ring:** it grips and seals the conduit without damaging the conduit jacket. Its symmetrical shape assures a foolproof assembly. It ensures a positive seal against oils, liquids, moisture and dust. Made from high-performance nylon. Colour: blue.
- **Gland nut:** rugged construction, made of zinc plated steel. Reinforced corners to allow hand screwing.

- High performance plastic cable fittings
- Special construction prevents twisting and ensures effective strain relief
- Easy to install
- For all cable sizes between 3.2 and 24.1 mm of outer diameter

### Technical Information

Style/thread	Straight and 90° NPT threads
IP rating	IP65
Material	UV resistant polyamide 6.6.
Steel locknut	Chromate finished steel or zinc
Seal	Neoprene
Colour	Black
Flammability rating	UL 94 V-2
Temperature range	-34°C to +105°C

## Cable grommets with strain relief

- Supplied with one Ty-Rap® cable tie to ensure a stable, tight and sealed strain relief
- Material with high elasticity
- Can also be used for single cables
- Chemically resistant
- Weather and UV resistant
- Simple and quick installation
- 5 sizes for cable diameters from 4 mm to 32 mm
- Maximal wall thickness 2.2 mm
- Typical applications: In control cabinets, in the building of motor vehicles, in the construction of machines,...

#### Conduits: directions for use

Below are a few short extracts taken from the relevant prescriptions.

VDE 0113/12.73

Metal tubing, pipes and conduits must be used in accordance with the prescribed safety standard.

Paragraph 10.3.1 states that all conduits must be designed to protect against the expected demands made on the product. This is to say, for example, that cable can only be fed through conduit if it is suitably protected from liquids, dust (IP-Protection) and other foreign substances.

Surfaces with which the laid conduits come into contact - such as edges, threads etc. should not damage the insulation of the conduit.

#### Fittings: directions for use

Conduits and fitting assemblies must be installed in accordance with VDE 0113.

It is not adequate just to feed the conduit into a housing. The conduit must be installed using a lock nut and fitting, which ensure a good electrical connection between the conduit and housing. The conduit must not reduce the protective capability of the housing. In order to ensure the effective installation of the conduit, it is important not only to use a suitable conduit but also to use the appropriate type of fitting. (see IEC-204)

#### Specifications

Shureseal™ fittings and conduits satisfy the following specifications:

- for heavy industrial applications in accordance with DIN 49012.
- according to IP67 rating
- according to DIN/VDE 0650, section, 2.1.1b
- according to BS731, part 1
- and have the necessary approvals (UL/CSA and VDE)

#### Installation

Installation is simple. The fitting screws easily onto the conduit, without the need for special tools. The fitting can be removed and re-used again at any time. The fitting also performs excellently against severe vibration. The conduit is not deformed by the fitting. In tests, the fittings have been shown to be extremely secure and guarantee a high level of security and reliability.

**Flexible metallic liquidtight conduits****Type TBEF - universal**

- TBEF (now integrating the TBHT grade) conduit with heavy duty double interlocked / single interlocked (with packing) galvanised steel core
- Universal conduit for all liquidtight applications requiring good mechanical strength and flexibility: machinery, conveyors, etc.
- Cotton packing for high flexibility (up to 1 1/4")
- High performance acid and oil resistant, self-extinguishing PVC jacket
- High mechanical stability
- Tested and certified in accordance with DIN VDE 0605:1982-04 (File Nr: 24058-5410-0050 / 32CRB F41 / LR, Document Nr.: 131354)
- Marked lengths (every 1 m) for quick and easy measuring and cutting

Length marking

1/4" - 1 1/4"

1 1/2" - 4"

## Flexible metallic liquidtight conduits Type TBDL - dual listed UL & CSA

- Type TBDL with UL / CSA approval, heavy duty double interlocked / single interlocked galvanised steel core
- Export and North-America oriented applications: multi-national projects, power plant, ...
- Copper wire packing for improved grounding (up to 1 1/4")
- High performance, acid- and oil-resistant PVC jacket, self-extinguishing in accordance with UL360
- Extremely high mechanical stability
- Marked lengths (every 1 m) for simple measuring and cutting
- Silicone free

## Flexible metallic liquidtight conduits Type TBEHC - extreme heat/cold

- Applications at extreme temperatures: refrigeration, transportation, industrial HVAC, heavy industries
- Very high tolerance to extreme changes in temperature
- Heavy duty double interlocked / single interlocked (with packing) galvanised steel core
- Cotton packing for high flexibility (up to 1 1/4")
- High performance acid- and oil-resistant Polyester jacket, self-extinguishing according to UL 94 V-2
- High mechanical stability in accordance with DIN 49 012
- Marked lengths (every 1m) for quick and easy measuring and cutting

4.1

### Technical Information

Outer jacket	Polyester, self-extinguishing within 30 seconds
Core	Galvanised steel
Packing	Cotton (up to 1 1/4")
Colour	Black
Temperature range	Static: -50°C to +130°C (+150°C intermittent) Flexing: -5°C to +130°C
Voltage breakdown (flash test)	> 2 kV
System IP rating	IP67, when correctly installed with T&B liquidtight fittings

C = reel 800 mm ø

See page 224 for explanations on min. bending radius and temperature ranges

Other sizes available upon request - please contact your Sales Office

For T&B liquidtight fittings see pages 238 to 246

Special fittings (HT series) rated at 150°C are now available for high temperature applications - please contact your Sales Office for product availability

## Flexible metallic liquidtight conduits Type TBZH - zero halogen

- Halogen free and low smoke outer jacket
- Ideal for applications where human lives can be a concern: public transportation, metro, train,...
- Heavy duty double interlocked / single interlocked (with packing) galvanised steel core
- Cotton packing for high flexibility (up to 1 1/4")
- High performance acid- and oil-resistant Olefin outer jacket, self-extinguishing within 30 seconds
- For use in safety areas (tunnels, public areas and transportation equipment)
- Marked lengths (every 1m) for quick and easy measuring and cutting
- NFF16-101 / NFF16-102 tested: I index = I3 (oxygen index = 40.7), F index = F1

Length marking

5/16" - 1 1/4"

1 1/2" - 2"

### Technical Information

Outer jacket	Olefin, self-extinguishing within 30 seconds
Core	Galvanised steel
Packing	Cotton (up to 1 1/4")
Colour	Black
Temperature range	Static: -25°C to +90°C Flexing: -5°C to +90°C
Voltage breakdown (flash test)	> 2 kV
Insulation resistance	> 100 MOhm
System IP rating	IP67, when correctly installed with T&B liquidtight fittings

# Shureseal™

## Flexible non-metallic liquidtight conduits Type LNMP - smooth outer surface

- UL and CSA approved
- Double layer construction offers a high level of mechanical stability for plastic tubing
- The Nylon lining between the 2 layers ensures a high level of flexibility
- High performance, durable acid- and oil resistant PVC outer jacket
- Perfectly designed for fittings which have to be safe, secure and electrically insulated
- Marked in lengths of 1 foot / 30.48 cm for quick and easy measuring and cutting
- High retention assured when used in association with T&B special fittings (Product Ref. 37XX and 63XX) (see pages 247 and 248)

4.1

### Technical Information

Material	2 layers of PVC with a woven Nylon fabric in between
Colour	Orange
Temperature range	-20°C to +60°C
System IP rating	IP66, when correctly installed with T&B liquidtight fittings

### Approvals

# Shureseal™

## Flexible non-metallic liquidtight conduits Type EFC - with strengthened inner coil

- Highly flexible, liquidtight plastic tubing with strengthened inner coil
- UV-resistant and weatherproof
- High chemical resistance
- UL recognised under File No. E 96548
- CSA approved File No. LL 067241
- Crush-resistant due to stiffening effects of strengthened inner coil
- The ultra-smooth inner surface ensures that cables and conductors can be fed through very easily
- Can be used with plastic or metallic T&B "Bullet" fittings (see pages 249 to 253)

## Material specifications

4.1

This chart gives an indication of the capabilities of the Shureseal™ liquidtight flexible metallic conduits. It is extremely difficult to provide data on all possible combinations or conditions that can occur.

Therefore it is recommended that this information should be used as a guideline and that the conduit should be tested in the intended application by the user, to determine suitability. If you have specific requirements, please contact Technical Support.

## Liquidtight fittings for flexible metallic conduits

### Product description

A standard fitting assembly is made of 4 pieces:

1. A screw body with a nylon throat on the connection side
2. The ground cone
3. The patented Nylon sealing ring
4. A gland nut

In addition, a locknut is supplied with the fittings with NPT thread.

### Product description

When correctly installed, the Shureseal™ fittings produce a positive seal against oil, liquids, moisture and dust.

The main features of the assembly include:

- a high resistance to conduit pull-off and a great resistance to vibration from machines
- an excellent earth continuity
- simplicity of installation: ability to install quickly by hand (or with standard spanners or wrenches, but no special tools are needed)
- the fittings will not damage or distort the flexible conduit.
- the nylon throat bush makes it easier to pull wires through without risk of damage.
- the fittings have a rugged construction and can be disconnected and reused.
- available with N.P.T., Imperial, P.G. and metric (I.S.O.) threads
- excellent IP ratings

The patented ground cone design offers the following advantages:

- it compresses the metallic convolutions of the conduit, providing a high quality ground contact with low impedance and a high conduit pull-off resistance
- the single helical thread on the ground cone is easy to install without cross threading
- it tolerates variations in conduit diameters and convolution pitch
- its rolled-over edge protects the conductors

The patented sealing ring design has the following exclusive features:

- it grips and seals the conduit without damaging the conduit jacket
- its symmetrical shape assures a foolproof assembly
- it ensures a positive seal against oils, liquids, moisture and dust

The range of fittings includes 5 different styles:

- straight version
- 45° version
- 90° version
- "Chase" = compact version for confined spaces, behind panels and boxes
- "Female Hub" version, for connecting flexible conduit direct to rigid conduit and flexible conduits

### Approvals

- C.E.G.B. approved (UK)
- UL listed Liquidtight File No E 23018
- ISO threads per BS 4568
- PG threads per DIN 40430
- Canadian Standard Association:  
File No. 002884, File No. LR 052391, File No. LR 82069

### Easy assembly without the requirement of any special tooling

1. Slide the gland nut and the sealing ring onto the conduit

2. Screw the ground cone into the conduit (between the convolutions) as far as possible

3. Screw the body and the gland nut together and tighten

The Thomas & Betts fittings are available in four different thread forms: NPT (National Pipe Taper), PG (Panzergewinde), Imperial and metric (I.S.O.).

NPT and PG threads have different contours (fig. 1 & 2). However a fitting with a male NPT thread (up to 2 inches) can easily be screwed into a part with a female PG thread (see table of compatibility for correspondences)

Fig 1. NPT thread according to USAS B2.1

Fig 2. PG thread according to DIN 40 430

### Table of compatibility

NPT MALE THREAD SIZE [inch]	MAX. OUTER DIAMETER D2 (ON NPT MALE THREAD) [mm]		MIN. CORE DIAMETER D1 (ON PG FEMALE THREAD) [mm]	CORRESPONDING PG FEMALE THREAD SIZE
3/8	16.66	→	17.26	PG 11
3/8	16.66	→	19.06	PG 13.5
1/2	20.96	→	21.16	PG 16
3/4	26.44	→	26.78	PG 21
1	33.25	→	35.48	PG 29
1 1/4	41.91	→	45.48	PG 36
1 1/2	47.80	→	52.48	PG 42
2	59.61	→	57.78	PG 48

### Liquidtight fittings for flexible metallic conduits

#### General information

#### Technical Information

Conduit type	Shureseal™ flexible metallic conduit
Style	Straight, 90° and 45°
Thread	NPT, Metric (I.S.O.), PG and Imperial
IP rating	IP67
Material	Galvanised steel chromate finish
Inner sleeve and sealing ring	Polyamide
Colour	Metallic

Special fittings (HT series) rated at 150°C are now available for high temperature applications - please contact your Sales Office for product availability

# Shureseal™

Liquidtight fittings for flexible metallic conduits

## "Chase" fittings, straight or right-angled

- High-performance fittings for Shureseal™ liquidtight conduits
- Special compact version (CHASE) for space-saving assembly, thanks to the male nipple (supplied with the fitting) that can be screwed into the female thread of the body
- Safe and effective installation without any efforts
- The fitting is composed of 6 parts: the threaded body, the steel ground cone, the nylon sealing ring, the gland nut, the sealing washer and a male nipple, ensuring an easy assembly without the need for specific tools
- The steel ground cone which is screwed into the conduit ensures an excellent earthing continuity and pull-off strength, as well as a very good resistance against vibrations
- Re-useable and independent replacement parts

### Technical Information

Conduit type	Shureseal™ flexible metallic conduit
Style/thread	Straight or right angled, NPT threads
System IP rating	IP67
Material	Zinc plated steel
Insulation throat and sealing ring	Polyamide
Colour	Metallic

## Liquidtight fittings for flexible metallic conduits

### Female hub and adaptor fittings

- High-performance special type fittings for Shureseal™ Liquidtight conduit
- **Special type hub fitting** with female (internal) thread for connecting flexible conduits to rigid conduits or for connecting 2 flexible conduits together (using male fittings)
- **Special type adaptor fitting** with female (internal) thread for connecting flexible conduits to AN-MS connector shells (such as MIL-C-5015 connectors and accessories)
- Safe and effective installation without any efforts
- The fitting is composed of 4 parts: the threaded body, the zinc plated steel ground cone, the nylon sealing ring and the gland nut ensuring an easy assembly without the need for specific tools
- The steel ground cone which is screwed into the conduit ensures an excellent earthing continuity and pull-off strength, as well as a very good resistance against vibrations
- Re-useable and independent replacement parts

Liquidtight fittings for non-metallic conduits

## Type LNMP - metallic fittings

- Easy installation
- Inner polyamide sleeve for protection of conductors
- Liquid- and dust-tight in accordance with IP66
- High mechanical stability (high retention)
- Supplied with locknut and sealing washer

## Liquidtight fittings for non-metallic conduits

## Type LNMP - plastic fittings

- Easy installation
- High strength, chemical resistant, non-burning, non dripping thermoplastic construction
- Smooth insulated body throughout for maximum dielectric strength
- Ideal for corrosion resistant applications
- Liquid- and dust-tight in accordance with IP66
- Serrated design provides high mechanical pullout strength
- Supplied with steel locknut and sealing 'O' ring

## Technical Information

Conduit type	Shureseal™ conduit type LNMP
Style/thread	Straight, 90°
System IP rating	IP66
Material	Body: thermoplastic Gland nut: thermoplastic 'O' Ring: Neoprene Locknut: Steel, case hardened and zinc plated

## Liquidtight fittings for non-metallic conduits

### Type EFC - plastic Bullet fittings

- Liquid-tight, dust-tight and oil-resistant
- Thomas & Betts patented quick connecting feature designed to prevent unlocking
- The spiral-shaped EFC conduit coil locks into fitting
- No loose pieces - secure against vibration
- Supplied with sealing washer (O ring)
- Fittings with NPT threads are supplied with locknut

### Technical Information

Conduit type	Shureseal™ conduit type EFC
Style/thread	Straight, 45°, 90°, NPT and metric (I.S.O.) threads
IP rating	IP65
Material	UV-resistant thermoplastic
Locknut	Zinc plated steel
Sealing washer	Nitryl
Colour	Black
Temperature range	-45°C to +105°C
Flammability rating	Self-extinguishing according to UL 94 V-2

## Liquidtight fittings for non-metallic conduits

### Type EFC - metallic Bullet fittings

- Metallic fitting, designed for type EFC flexible plastic conduit
- Liquid-tight, dust-tight and oil-resistant
- Robust construction, ideal for demanding applications like in the railway industry (can be used with other kind of conduits and hoses commonly used in the railway industry, such as textile inserted rubber hoses,...)
- Liquid-tight, dust-tight and oil-resistant
- Thomas & Betts patented quick connecting feature designed to prevent unlocking
- Separate rotating attachment for easy fitting of conduit
- Spiral-shaped EFC conduit coil locks into fitting
- No loose pieces - secure against vibration
- Delivered with locknut

### Technical Information

Conduit type	Shureseal™ conduit type EFC
Style/thread	Straight, 45°, 90°, NPT and Metric (I.S.O.) threads
IP rating	IP65
Material	Body: zinc plated steel Gland nut: zinc steel Insert: nylon

## Liquidtight fittings for non-metallic conduits

### Type EFC - metallic Bullet, Chase version

- Metallic fitting, designed for type EFC flexible plastic conduit Special version (Chase) for space saving assembly, thanks to the male nipple that can be screwed into the female thread of the body
- Liquid-tight, dust-tight and oil-resistant
- Robust construction, ideal for demanding applications like in the railway industry (can be used with other kind of conduits and hoses commonly used in the railway industry, such as textile inserted rubber hoses,...)
- Spiral-shaped EFC conduit coil locks into fitting
- The fitting is composed of 5 components: nipple with insulation throat, o-ring, body, insert and gland nut (Product Ref. LT6275MI also includes an additional sleeve)

### Technical Information

Conduit type	Shureseal™ conduit type EFC
Style/thread	Straight
IP rating	IP65
Material	Body: zinc plated steel Gland nut: zinc plated steel Insert: nylon O-ring: neoprene

## Accessories for fittings Sealing washers

- Design locks resilient sealing material in steel
- Steel retainer protects seal from extruding out under torque and limits compression to an optimum predetermined value; provides high quality seal
- Resilient material flows and seals rough surfaces

### Technical Information

**Strain Relief Wire Mesh adaptor** with integrated gland nut:

- Simple installation: just replace the existing gland nut in the fitting with the wire mesh adaptor
- Provides a support function (strain relief), to protect the conduit at the point of connection
- Rounded corners ensure secure attachment of the conduit without the risk of damage
- Anti-corrosive

## Replacements parts for liquidtight metallic fittings

If after some time the fitting is released and needs to be re-secured, the seal and the ground cone should be replaced.

The following accessories are appropriate for all the standard liquidtight Shureseal™ fittings for metallic conduits:

- **Steel ground cone:** it provides a high quality ground contact with low impedance and high conduit pull-off resistance. The single helical thread on ground cone is easy to install by hand without cross threading. It tolerates variations in conduit diameters and convolution pitch. Its rolled-over edge protects the conductors. Manufactured in zinc plated steel.
- **Sealing ring:** it grips and seals the conduit without damaging the conduit jacket. Its symmetrical shape assures a foolproof assembly. It ensures a positive seal against oils, liquids, moisture and dust. Made from high-performance nylon. Colour: blue.
- **Gland nut:** rugged construction, made of zinc plated steel. Reinforced corners to allow hand screwing.

# Shureseal™

## Cable grommets with strain relief

- Supplied with one Ty-Rap® cable tie to ensure a stable, tight and sealed strain relief
- Material with high elasticity
- Can also be used for single cables
- Chemically resistant
- Weather and UV resistant
- Simple and quick installation
- 5 sizes for cable diameters from 4 mm to 32 mm
- Maximal wall thickness 2.2 mm
- Typical applications: In control cabinets, in the building of motor vehicles, in the construction of machines,...

4.3

### Technical Information

Material, gland	Neoprene
Material, cable tie	Polyamide 6.6
Colour	Black
Temperature range	-30°C to +90°C
Flammability	UL 514

### Ordering Information
