

## Liquidtight Flexible Metal Conduit Fittings

### Specifications

#### Ref. CEC Rule 12-1300

Liquidtight flexible metal conduit is a raceway of circular cross section having an outer liquidtight nonmetallic, sunlight resistant jacket over a flexible metal core.

Liquidtight flexible metal conduit is permitted to be used for exposed or concealed work, in dry, damp or wet locations indoors and outdoors. With the exception of Class I Division I locations, liquidtight flexible metal conduit is considered an acceptable wiring method in hazardous locations Class 1 Division 2 (CEC Rule J18-152(6)).

Liquidtight flexible metal conduit is not permitted where subjected to mechanical injury. The conduit is not permitted to be used underground or embedded in cinder fill or concrete. It cannot be used as a general purpose raceway.

Use of liquidtight conduit is not permitted where any combination of ambient or conductor temperature will produce temperature in excess of that for which the jacket is rated or in locations where flexing at low temperature will injure jacket. Liquidtight flexible metal conduit is not permitted for conductors over 600 volts.

Liquidtight flexible conduit is available in 3/8 in. through 6 in. trade size. Conduit is constructed with galvanized steel or aluminum core, regular or extra flex. Outer jacket is available for a variety of applications, e.g. oil resistant where exposed to cutting oils and for service temperature ranging from -50°C to 150°C.

Listed and certified conduits are constructed of galvanized steel core and thermoplastic jacket rated for maximum service temperature of 60°C and suitable for exposure to mineral oils but not to gasoline and similar solvents.

Conduit is required to be supported adequately, and bending is restricted to 360 degrees total.

Please refer to the following for further details and complete information:

#### Please Note

The excerpts and other material herein, whether relating to the Canadian Electrical Code 2012 Part I, the Underwriters Laboratories, Inc. listing, to industry practice or otherwise, are not intended to provide all relevant information required for use and installation. Reference to original or primary source material and data is mandatory before any application or use is made of the product.

## Liquidtight Flexible Metal Conduit Fittings

### Suggested Specifications for Liquidtight Flexible Metal Conduit Fittings

- Liquidtight Flexible Metal conduit used shall be of the type with galvanized steel core inside and outside and outer thermoplastic jacket suitable for the ambient environmental conditions. Jacket shall be positively locked to core to prevent sleeving. Where used as an equipment grounding conductor, the conduit shall conform to applicable standards UL 360/CSA C22.2 No. 56.
- Flexible conduit when installed shall have sufficient slack to avoid sharp flexing and straining due to vibration and thermal expansion/constriction. Conduit shall be installed in such a manner that liquids will tend to run off the surface instead of draining toward the fittings.
- Where liquidtight flexible metal conduit terminates into a threaded or threadless opening, the conduit shall be assembled with approved liquidtight fittings. Fittings used shall be reusable type of malleable iron/steel construction, electro-zinc plated inside and outside, furnished with nylon insulated throat and taper threaded hub as manufactured by Thomas & Betts, Series 5331.

Approved fittings installed shall be:

- (1) Designed to prevent sleeving, assure plastic (raceway jacket) to plastic (gasket) seal.

- (2) Equipped with grounding device to assure ground continuity irrespective of raceway core construction. Grounding device if inserted into raceway and directly in contact with conductors shall have rolled over edges for sizes under 5 inches.

At the point of flexing (i.e. where raceway leaves fitting) the thermoplastic raceway jacket shall not be permitted to be in direct contact with metal.

- Where liquidtight flexible metal conduit is terminated into a threadless opening using a threaded hub fitting such as Thomas & Betts Series 5331, a suitable moisture resistant/oil resistant synthetic rubber gasket such as Thomas & Betts Series 5262 shall be provided between the outside of box or enclosure and fitting shoulder. Gasket shall be adequately protected by and permanently bonded to a metallic retainer.
- Where liquidtight flexible metallic raceway is installed in outdoor or indoor locations and is exposed to environmental conditions that are more than normally corrosive to exposed surfaces, PVC coated liquidtight flexible metal conduit fittings such as Series 3321 manufactured by Thomas & Betts shall be used. Fittings shall be coated with a nominal thickness of 0.040

PVC and must meet the general requirements for liquidtight flexible metal conduit fittings indicated above.

- Liquidtight fittings required to couple threaded end of a fitting or pipe where rotation of fitting or pipe is limited or restricted shall be reusable type of malleable iron/steel construction, electro-zinc plated inside/outside with taper threaded hub as manufactured by Thomas & Betts, Series 41. Fittings shall be equipped with a moisture resistant/oil resistant synthetic rubber gasket. Metal to metal seal or metal to thermoplastic seal for this application shall be considered unacceptable.

## Liquidtight Flexible Metal Conduit Fittings

### Specifications

#### Application

- Used where flexible metal raceway is installed in outdoor or indoor locations where exposed to continuous or intermittent moisture
- To positively bond conduit to box or enclosure

#### Features

- Ability to install quickly with low torque effort
- Ground cone design offers following advantages
  - (1) Compresses metallic convolutions; provides high quality ground contact with low impedance and high raceway holding power (A)
  - (2) Single helical thread on ground cone is easy to install without cross threading; accepts variations in raceway diameters and convolution pitch (B)
  - (3) Rolled over edge protects conductors (C)

Sealing ring design has following exclusive features:

- (1) Grips and seals at leading and trailing edge — will not abrade raceway jacket (D)
  - (2) Provided with grooves on inside diameter for anti-sleeving (E)
  - (3) Shoulders on both ends for extra sealing (F)
  - (4) Symmetrical shape assures foolproof assembly
- Can be disconnected and reused
  - Watertight/oiltight installation at box or enclosure termination is assured by
    - (1) External taper thread hub on 5331 Series and use of sealing gasket 5262 Series (G)
    - (2) Captive sealing 'O' ring on 5361 Series (H)
    - (3) Taper tapped hole on 5271 Series
  - For Hazardous Location applications, please refer to CEC Section 18

- CEC Rule 12-1306 stipulates "a separate bonding conductor shall be installed in liquidtight flexible conduit in accordance with section 10
- 1/2 in. and 1-1/4 in. sizes Laboratory tested to carry ground fault current of up to 1000 amps RMS with duration of fault current 3 cycles
- Conforms with JIC requirements
- Available with imperial, I.S.O. and PG threaded hub

#### Standard Material 5331-5361-5271 Series

Body, Gland, Locknut and Ground Cones: All steel or malleable iron.

Sealing Ring and Insulator: All thermoplastic rated min. -20°C max. 105°C

Sealing Gasket: Stainless Steel and Buna N

#### 5231 AL Series

All Copper-free Aluminum (non-insulated)

#### Standard Finish 5331-5361-5271 Series

Electro Zinc Plated and Chromate Coated

#### 5231 AL Series

Copper-free Aluminum

#### Range

- 5331 Series 3/8 in. thru 6 in. conduit
- 5341 Series 3/8 in. thru 4 in. conduit
- 5351 Series 3/8 in. thru 4 in. conduit
- 5361 Series 3/8 in. thru 4 in. conduit
- 5271 Series 3/8 in. thru 1-1/4 in. conduit
- 5231 AL Series 3/8 in. thru 4 in. conduit  
All hubs provided with taper pipe threads (NPT)

#### Conformity

## Liquidtight Flexible Metal Conduit Fittings

### High Temperature Flexible Metal Liquidtight Fittings

T&B HT-Series Liquidtight Fittings are available straight, 45°, and 90°

#### Suggested Specification

Where Liquidtight flexible metal fittings are required in high temperature environments up to 150°C:

- Fitting's body, gland, locknut and ground cone shall be constructed from steel or malleable iron, electro-zinc plated and chromate coated for corrosion protection
- Fitting's sealing ring and throat insulator will be molded from high temperature nylon suitable for temperatures up to 150°C and a minimum UL flammability rating of UL94-V2
- The fitting shall be constructed to accept high temperature flexible metal liquidtight conduit rated to 150°C (works with our ATX Series conduit, p. G11)
- The fitting shall have a plastic throat insulator to protect conductors
- The fitting shall have a steel ground cone to:
  - provide high quality ground contact

- single helical thread for easy installation into conduit
- rolled over edge to protect conductors

- The fitting shall have a plastic sealing ring to:
  - grip and seal at leading and trailing edge (double bevel up to 2 in.) of conduit jacket
  - provide a watertight/oiltight seal
- The fittings shall be able to terminate the conduit in either a threaded or threadless opening
- For applications where termination into a threaded opening is required the fitting shall have external tapered NPT threads
- For applications where termination into a threadless opening is required use an acceptable sealing ring
- Fittings shall conform to UL 514B
- Accepted Manufacturers: Thomas & Betts — 5331-HT straight Series, 5341-HT 45° Series, 5351-HT 90° Series; 5262 sealing ring Series

#### Straight Liquidtight Fittings

## Liquidtight Flexible Metal Conduit Fittings

### Stainless Steel

#### The strength of steel – with superior corrosion-resistance!

Until now, there's been no ideal conduit fitting solution for use in heavily corrosive environments. Traditional metallic fittings corrode and require frequent replacement. Nonmetallic fittings offer less strength, lower UV-resistance, and don't stand up well in extreme temperatures. T&B Stainless Steel Liquidtight Conduit Connectors are constructed of 304 stainless steel to resist corrosion while offering high strength, high UV-resistance, and high endurance. Choose among a full range of fittings in straight, 45°, and 90° angled configurations for 3/8 in. to 2 in. conduit sizes. Look for the distinctive blue insulator and sealing ring for assurance of T&B quality.

- Ideal for industrial MRO and OEM applications in food and beverage, pharmaceutical, petrochemical, waste water, salt water, and other corrosive environments
- Connects metallic-cored liquidtight conduit to a box or enclosure
- 304 stainless steel body and gland-nut resists corrosion far better than other metallic fittings
- Stronger, more UV-resistant than nonmetallic fittings
- Available in straight, 45°, and 90° angled configurations to fit conduit from 3/8 in. to 2 in.
- UL Listed Ratings: 3, 3R, 4, 4X
- 5262 Sealing Ring Gasket (sold separately) includes a stainless steel retaining ring to prevent elongation of the gasket and is made from Santoprene™ material, ensuring a superior seal

## Liquidtight Flexible Metal Conduit Fittings

### Quick-Connect™ Liquidtight Fittings Push. Tighten. Done!

The quality of the T&B Liquidtight system in a labour-saving Quick-Connect™ fitting. Innovative push-in technology with a captive sealing ring makes it installation-ready.

Flexible conduit is used in a wide variety of challenging environments. You need fittings to match. That's why Thomas & Betts offers four different liquidtight lines, including our new time-saving, Quick-Connect™ fittings.

- Ideal for any industrial MRO or OEM application where high performance is required
- Often used in food and beverage, wastewater and chemical processing industries
- Each liquidtight fitting is designed to exceed expectations
- Simple installation and worry-free connections

5374 †	1	1-23/32	2-1/4	11/32

With SAFE-EDGE™ ground cone and double bevel sealing ring  
Note: UL Listed Liquidtight; & CSA certified watertight. Suitable for hazardous locations use in Class I, Div. 2; Class II, Div. 1 and 2; Class III, Div. 1 and 2, where general purpose equipment is specifically permitted per NEC © Section 500-2(a).  
† UL Listed as grounding means under NEC 351-7.

## Liquidtight Flexible Metal Conduit Fittings

### Specifications — External Bonding

#### Application

- Used where external bonding jumper is required around liquidtight flexible metal conduit
- To positively bond conduit to box or enclosure
- Used where flexible raceway is installed in outdoor or indoor locations where exposed to continuous or intermittent moisture

#### Features

- Designed with provision to install bonding jumper in several positions
- Designed to accept mechanical or compression lug
- Ability to install quickly with low torque effort
  - (i) Compresses metallic convolutions; assures ground contact with low impedance and high raceway holding power (A)
  - (ii) Single helical thread on ground cone is easy to install without cross threading; accepts variations in raceway diameters and convolution pitch (B)
  - (iii) Rolled over edge protects conductors (C)
- Sealing ring design has following exclusive features:
  - (i) Grips and seals at leading and trailing edge — will not abrade raceway jacket (D)
  - (ii) Provided with grooves on inside diameter for anti-sleeving (E)
  - (iii) Shoulders on both ends for extra sealing (F)
  - (iv) Symmetrical shape assures foolproof assembly
- Can be disconnected and reused
- Watertight/oiltight installation at box or enclosure termination is assured by:
  1. External taper thread hub on 5331GR Series and use of sealing gasket 5262 Series (G)
  2. Taper tapped hole on 5271 Series
- For Hazardous Location applications, please refer to CEC Section 18
- Conforms with JIC requirements

- CEC Rule 12-1306 stipulates “a separate bonding conductor shall be installed in liquidtight flexible conduit in accordance with section 10”
- CEC Rule 10-618 (3) “The armour of flexible metal conduit and liquidtight flexible metal conduit shall not be considered as fulfilling the requirements of a bonding conductor for the purposes of this rule, and a separate bonding conductor shall be run within the conduit”

#### Standard Material

**Lugs:** High conductivity copper (for copper conductor only)

**Body, Gland, Locknut & Ground**

**Cones:** All steel or malleable iron

**Sealing Ring and Insulator:**

All thermoplastic

**Sealing Gasket:** Stainless Steel & Buna N

**Strap:** Steel

#### Standard Finish

All Electro Zinc Plated and Chromate Coated except lugs

**Lugs:** Bright Dipped

#### Range

- 5331GR Series (straight fittings with male hub): 3/8 in. thru 6 in. conduit
  - 5341GR Series (45°): 3/8 in. thru 4 in. conduit
  - 5351GR Series (90°): 3/8 in. thru 4 in. conduit
  - 5271GR Series (straight fittings with female hub): 3/8 in. thru 1-1/4 in. conduit
- All hubs provided with taper pipe threads (NPT)

#### Conformity

UL 467  
 UL 514B  
 CSA C22.2 No. 18.3  
 CSA C22.2 No. 41  
 NEMA FB-1  
 NFPA 70-2008 (ANSI)  
 JIC EGP1  
 JIC EMP1  
 Federal Specification W-F-406  
 Federal Standard H-28 (threads)

Series 5331GR

Series 5271GR

#### Sleeving

Raceway Jacket pulls off — exposing core and affecting liquidtight termination. Feature (E) on sealing ring helps overcome this problem.

Cat. No.	Conduit Size (in.)
38GR-TB	3/8
12GR-TB	1/2
34GR-TB	3/4
1GR-TB	1

The grounding device is a combination of a set screw and a grounding lug that can be used to retrofit any existing liquidtight fitting to an externally grounded version

## Liquidtight Flexible Metal Conduit Fittings

### Specifications — PVC Coated

**3321 Series\***  
 \*3361 Series...same as 3321, except 90°  
 3341 Series...same as 3321, except 45°

#### Application

- Used where liquidtight flexible metal conduit is installed in outdoor or indoor locations where exposed to environmental conditions that are more than normally corrosive to exposed surfaces
- To positively bond conduit to box or enclosure

#### Features

- PVC coated to protect fitting from extremely corrosive surroundings without affecting integrity of electrical grounding path (A)
- Provided with overlapping sleeve for additional seal (B)
- Ability to install quickly with low torque effort
- Ground cone design offers following advantages:
  - (i) Compresses metallic convolutions; provides high quality ground contact with low impedance and high raceway holding power (C)
  - (ii) Single helical thread on ground cone is easy to install without cross threading; accepts variations in raceway diameters and convolution pitch (D)
  - (iii) Rolled over edge protects conductors (E)
- Sealing ring design has following exclusive features:
  - (1) Grips and seals at leading and trailing edge—will not abrade raceway jacket (F)
  - (2) Provided with grooves on inside diameter for anti-sleeving (G)
  - (3) Shoulders on both ends for extra sealing
  - (4) Symmetrical shape assures foolproof assembly
- Hardened steel or malleable iron locknut (H)
- Can be disconnected and reused
- Watertight/oiltight installation at box or enclosure termination is provided by external taper thread hub and sealing gasket (I)
- Conforms with JIC requirements

#### Standard Material

##### Body, Gland, Locknut and Ground Cones:

All steel or malleable iron

##### Sealing Ring and Insulator:

All thermoplastic

##### Sealing Gasket, Retainer:

Stainless Steel

##### Resilient Seal:

Buna N

##### Coating:

PVC

##### Standard Finish

##### Outside of body and gland:

PVC Coated 0.040 min. Thickness

##### Inside of body and gland:

Electro Zinc Plated and Chromate Coated

##### Locknut, Sealing Gasket, and Retainer:

Electro Zinc Plated and Chromate Coated

#### Range

- 3321, 3361 and 3341 Series  
 3/8 in. thru 4 in. conduit

All hubs provided with taper pipe threads (NPT).

#### Conformity

- UL 514B

## Liquidtight Flexible Metal Conduit Fittings

### Specifications — Liquidtight Union for Threaded Hub

41 Series

#### Application

- To couple threaded end of a fitting or a pipe to a tapped opening in a box or enclosure where rotation of fitting or pipe is limited or restricted

#### Features

- Provides high quality bond between fitting or pipe to the union
- Provided with resilient seal (A)
- Resilient seal subjected to controlled deformation; positive seal and reusability are assured (B)
- Unique design centralizes throat openings of threaded hub and union (C)
- Permits orientation of fitting in any predetermined direction for a safe, functional and neat assembly
- Provided with taper-threaded hub for liquidtight assembly (D)
- Straight pipe threads on gland accept a straight-or taper-threaded hub on fitting or pipe to be coupled (E)
- Suitable for hazardous location use per CEC Rule J18-106 Class I, Div. 1; CEC Rule 18-202 Class II, Div. 1; CEC Rule 18-252 Class II, Div. 2; CEC Rule 18-302 Class III, Div. 1; CEC Rule 18-352 Class III, Div. 2;

#### Standard Material/Finish

- Gland** Steel/Electro Zinc Chromate Coated
- Body** Steel/Electro Zinc Chromate Coated
- 'O' Ring** Buna N/As Molded

#### Range

- Hub (External Thread) 1/2 in. and 3/4 in. NPT
- Gland (Internal Threads) 1/2 in. and 3/4 in. NPS

#### Conformity

- UL 514B
- CSA C22.2 No. 18.3
- NEMA FB-1
- ANSI C80.4
- NFPA 70-2008 (ANSI)
- Federal Specification W-F-408
- Federal Specification W-F-406
- Federal Standard H-28 (Threads)

Steel, zinc plated and chromated. Ideal for angle fittings where swing clearance is not available

## Liquidtight Flexible Metal Conduit Fittings

### Specifications — Liquidtight Sealing Gaskets

5262 Series

#### Application

- When used with an externally threaded fitting provides a tight seal against oil, fumes or moisture at the knockout opening

#### Features

- Locks resilient sealing material in steel.
- Steel retainer protects seal from extruding out under torque and limits compression to an optimum predetermined value; provides high quality seal
- Resilient material flows and seals rough surfaces

#### Standard Material

**Retainer** Stainless Steel

**Sealing Material** Buna N

#### Range

- 1/2 in. thru 4 in. Hub Size

NEMA 3R, 4, 6 & 13

For use with T&B® Fittings. Sealing material resists oil, coolants, and hydraulic fluids as well as water

## Liquidtight Flexible Metal Conduit Fittings

### Specifications

#### Ref. CEC Rule 12-1300

Liquidtight flexible metal conduit is a raceway of circular cross section having an outer liquidtight nonmetallic, sunlight resistant jacket over a flexible metal core.

Liquidtight flexible metal conduit is permitted to be used for exposed or concealed work, in dry, damp or wet locations indoors and outdoors. With the exception of Class I Division I locations, liquidtight flexible metal conduit is considered an acceptable wiring method in hazardous locations Class 1 Division 2 (CEC Rule J18-152(6)).

Liquidtight flexible metal conduit is not permitted where subjected to mechanical injury. The conduit is not permitted to be used underground or embedded in cinder fill or concrete. It cannot be used as a general purpose raceway.

Use of liquidtight conduit is not permitted where any combination of ambient or conductor temperature will produce temperature in excess of that for which the jacket is rated or in locations where flexing at low temperature will injure jacket. Liquidtight flexible metal conduit is not permitted for conductors over 600 volts.

Liquidtight flexible conduit is available in 3/8 in. through 6 in. trade size. Conduit is constructed with galvanized steel or aluminum core, regular or extra flex. Outer jacket is available for a variety of applications, e.g. oil resistant where exposed to cutting oils and for service temperature ranging from -50°C to 150°C.

Listed and certified conduits are constructed of galvanized steel core and thermoplastic jacket rated for maximum service temperature of 60°C and suitable for exposure to mineral oils but not to gasoline and similar solvents.

Conduit is required to be supported adequately, and bending is restricted to 360 degrees total.

Please refer to the following for further details and complete information:

9. CSA C22.2 Nos. 18.1 and 18.3... Safety Standards for Outlet Boxes, Conduit Boxes and Fittings

#### Please Note

The excerpts and other material herein, whether relating to the Canadian Electrical Code 2012 Part I, the Underwriters Laboratories, Inc. listing, to industry practice or otherwise, are not intended to provide all relevant information required for use and installation. Reference to original or primary source material and data is mandatory before any application or use is made of the product.

## Liquidtight Flexible Metal Conduit Fittings

### Suggested Specifications for Liquidtight Flexible Metal Conduit Fittings

- Liquidtight Flexible Metal conduit used shall be of the type with galvanized steel core inside and outside and outer thermoplastic jacket suitable for the ambient environmental conditions. Jacket shall be positively locked to core to prevent sleeving. Where used as an equipment grounding conductor, the conduit shall conform to applicable standards UL 360/CSA C22.2 No. 56.
- Flexible conduit when installed shall have sufficient slack to avoid sharp flexing and straining due to vibration and thermal expansion/constriction. Conduit shall be installed in such a manner that liquids will tend to run off the surface instead of draining toward the fittings.
- Where liquidtight flexible metal conduit terminates into a threaded or threadless opening, the conduit shall be assembled with approved liquidtight fittings. Fittings used shall be reusable type of malleable iron/steel construction, electro-zinc plated inside and outside, furnished with nylon insulated throat and taper threaded hub as manufactured by Thomas & Betts, Series 5331.

Approved fittings installed shall be:

- (1) Designed to prevent sleeving, assure plastic (raceway jacket) to plastic (gasket) seal.

- (2) Equipped with grounding device to assure ground continuity irrespective of raceway core construction. Grounding device if inserted into raceway and directly in contact with conductors shall have rolled over edges for sizes under 5 inches.

At the point of flexing (i.e. where raceway leaves fitting) the thermoplastic raceway jacket shall not be permitted to be in direct contact with metal.

- Where liquidtight flexible metal conduit is terminated into a threadless opening using a threaded hub fitting such as Thomas & Betts Series 5331, a suitable moisture resistant/oil resistant synthetic rubber gasket such as Thomas & Betts Series 5262 shall be provided between the outside of box or enclosure and fitting shoulder. Gasket shall be adequately protected by and permanently bonded to a metallic retainer.
- Where liquidtight flexible metallic raceway is installed in outdoor or indoor locations and is exposed to environmental conditions that are more than normally corrosive to exposed surfaces, PVC coated liquidtight flexible metal conduit fittings such as Series 3321 manufactured by Thomas & Betts shall be used. Fittings shall be coated with a nominal thickness of 0.040

PVC and must meet the general requirements for liquidtight flexible metal conduit fittings indicated above.

- Liquidtight fittings required to couple threaded end of a fitting or pipe where rotation of fitting or pipe is limited or restricted shall be reusable type of malleable iron/steel construction, electro-zinc plated inside/outside with taper threaded hub as manufactured by Thomas & Betts, Series 41. Fittings shall be equipped with a moisture resistant/oil resistant synthetic rubber gasket. Metal to metal seal or metal to thermoplastic seal for this application shall be considered unacceptable.

## Liquidtight Flexible Metal Conduit Fittings

### Specifications

#### Application

- Used where flexible metal raceway is installed in outdoor or indoor locations where exposed to continuous or intermittent moisture
- To positively bond conduit to box or enclosure

#### Features

- Ability to install quickly with low torque effort
- Ground cone design offers following advantages
  - (1) Compresses metallic convolutions; provides high quality ground contact with low impedance and high raceway holding power (A)
  - (2) Single helical thread on ground cone is easy to install without cross threading; accepts variations in raceway diameters and convolution pitch (B)
  - (3) Rolled over edge protects conductors (C)

Sealing ring design has following exclusive features:

- (1) Grips and seals at leading and trailing edge — will not abrade raceway jacket (D)
  - (2) Provided with grooves on inside diameter for anti-sleeving (E)
  - (3) Shoulders on both ends for extra sealing (F)
  - (4) Symmetrical shape assures foolproof assembly
- Can be disconnected and reused
  - Watertight/oiltight installation at box or enclosure termination is assured by
    - (1) External taper thread hub on 5331 Series and use of sealing gasket 5262 Series (G)
    - (2) Captive sealing 'O' ring on 5361 Series (H)
    - (3) Taper tapped hole on 5271 Series
  - For Hazardous Location applications, please refer to CEC Section 18

- CEC Rule 12-1306 stipulates "a separate bonding conductor shall be installed in liquidtight flexible conduit in accordance with section 10
- 1/2 in. and 1-1/4 in. sizes Laboratory tested to carry ground fault current of up to 1000 amps RMS with duration of fault current 3 cycles
- Conforms with JIC requirements
- Available with imperial, I.S.O. and PG threaded hub

#### Standard Material 5331-5361-5271 Series

Body, Gland, Locknut and Ground Cones: All steel or malleable iron.

Sealing Ring and Insulator: All thermoplastic rated min. -20°C max. 105°C

Sealing Gasket: Stainless Steel and Buna N

#### 5231 AL Series

All Copper-free Aluminum (non-insulated)

#### Standard Finish 5331-5361-5271 Series

Electro Zinc Plated and Chromate Coated

#### 5231 AL Series

Copper-free Aluminum

#### Range

- 5331 Series 3/8 in. thru 6 in. conduit
- 5341 Series 3/8 in. thru 4 in. conduit
- 5351 Series 3/8 in. thru 4 in. conduit
- 5361 Series 3/8 in. thru 4 in. conduit
- 5271 Series 3/8 in. thru 1-1/4 in. conduit
- 5231 AL Series 3/8 in. thru 4 in. conduit  
All hubs provided with taper pipe threads (NPT)

#### Conformity

## Liquidtight Flexible Metal Conduit Fittings

### High Temperature Flexible Metal Liquidtight Fittings

T&B HT-Series Liquidtight Fittings are available straight, 45°, and 90°

#### Suggested Specification

Where Liquidtight flexible metal fittings are required in high temperature environments up to 150°C:

- Fitting's body, gland, locknut and ground cone shall be constructed from steel or malleable iron, electro-zinc plated and chromate coated for corrosion protection
- Fitting's sealing ring and throat insulator will be molded from high temperature nylon suitable for temperatures up to 150°C and a minimum UL flammability rating of UL94-V2
- The fitting shall be constructed to accept high temperature flexible metal liquidtight conduit rated to 150°C (works with our ATX Series conduit, p. G11)
- The fitting shall have a plastic throat insulator to protect conductors
- The fitting shall have a steel ground cone to:
  - provide high quality ground contact

- single helical thread for easy installation into conduit
- rolled over edge to protect conductors

- The fitting shall have a plastic sealing ring to:
  - grip and seal at leading and trailing edge (double bevel up to 2 in.) of conduit jacket
  - provide a watertight/oiltight seal
- The fittings shall be able to terminate the conduit in either a threaded or threadless opening
- For applications where termination into a threaded opening is required the fitting shall have external tapered NPT threads
- For applications where termination into a threadless opening is required use an acceptable sealing ring
- Fittings shall conform to UL 514B
- Accepted Manufacturers: Thomas & Betts — 5331-HT straight Series, 5341-HT 45° Series, 5351-HT 90° Series; 5262 sealing ring Series

#### Straight Liquidtight Fittings

## Liquidtight Flexible Metal Conduit Fittings

### Stainless Steel

#### The strength of steel – with superior corrosion-resistance!

Until now, there's been no ideal conduit fitting solution for use in heavily corrosive environments. Traditional metallic fittings corrode and require frequent replacement. Nonmetallic fittings offer less strength, lower UV-resistance, and don't stand up well in extreme temperatures. T&B Stainless Steel Liquidtight Conduit Connectors are constructed of 304 stainless steel to resist corrosion while offering high strength, high UV-resistance, and high endurance. Choose among a full range of fittings in straight, 45°, and 90° angled configurations for 3/8 in. to 2 in. conduit sizes. Look for the distinctive blue insulator and sealing ring for assurance of T&B quality.

- Ideal for industrial MRO and OEM applications in food and beverage, pharmaceutical, petrochemical, waste water, salt water, and other corrosive environments
- Connects metallic-cored liquidtight conduit to a box or enclosure
- 304 stainless steel body and gland-nut resists corrosion far better than other metallic fittings
- Stronger, more UV-resistant than nonmetallic fittings
- Available in straight, 45°, and 90° angled configurations to fit conduit from 3/8 in. to 2 in.
- UL Listed Ratings: 3, 3R, 4, 4X
- 5262 Sealing Ring Gasket (sold separately) includes a stainless steel retaining ring to prevent elongation of the gasket and is made from Santoprene™ material, ensuring a superior seal

**5262 Series  
Sealing Ring Gasket  
sold separately**

## Liquidtight Flexible Metal Conduit Fittings

### Quick-Connect™ Liquidtight Fittings Push. Tighten. Done!

The quality of the T&B Liquidtight system in a labour-saving Quick-Connect™ fitting. Innovative push-in technology with a captive sealing ring makes it installation-ready.

Flexible conduit is used in a wide variety of challenging environments. You need fittings to match. That's why Thomas & Betts offers four different liquidtight lines, including our new time-saving, Quick-Connect™ fittings.

- Ideal for any industrial MRO or OEM application where high performance is required
- Often used in food and beverage, wastewater and chemical processing industries
- Each liquidtight fitting is designed to exceed expectations
- Simple installation and worry-free connections

### Standard Material/Finish

<b>Steel:</b>	Gland nut, ground cone, body, locknut
<b>Finish:</b>	Zinc Plated Coated
<b>Nylon:</b>	Sealing ring, insulator
<b>Temp. rating:</b>	105°C

5374 †	1	1-23/32	2-1/4	11/32

With SAFE-EDGE™ ground cone and double bevel sealing ring  
Note: UL Listed Liquidtight; & CSA certified watertight. Suitable for hazardous locations use in Class I, Div. 2; Class II, Div. 1 and 2; Class III, Div. 1 and 2, where general purpose equipment is specifically permitted per NEC © Section 500-2(a).  
† UL Listed as grounding means under NEC 351-7.

## Liquidtight Flexible Metal Conduit Fittings

### Specifications — External Bonding

#### Application

- Used where external bonding jumper is required around liquidtight flexible metal conduit
- To positively bond conduit to box or enclosure
- Used where flexible raceway is installed in outdoor or indoor locations where exposed to continuous or intermittent moisture

#### Features

- Designed with provision to install bonding jumper in several positions
- Designed to accept mechanical or compression lug
- Ability to install quickly with low torque effort
  - (i) Compresses metallic convolutions; assures ground contact with low impedance and high raceway holding power (A)
  - (ii) Single helical thread on ground cone is easy to install without cross threading; accepts variations in raceway diameters and convolution pitch (B)
  - (iii) Rolled over edge protects conductors (C)
- Sealing ring design has following exclusive features:
  - (i) Grips and seals at leading and trailing edge — will not abrade raceway jacket (D)
  - (ii) Provided with grooves on inside diameter for anti-sleeving (E)
  - (iii) Shoulders on both ends for extra sealing (F)
  - (iv) Symmetrical shape assures foolproof assembly
- Can be disconnected and reused
- Watertight/oiltight installation at box or enclosure termination is assured by:
  1. External taper thread hub on 5331GR Series and use of sealing gasket 5262 Series (G)
  2. Taper tapped hole on 5271 Series
- For Hazardous Location applications, please refer to CEC Section 18
- Conforms with JIC requirements

- CEC Rule 12-1306 stipulates “a separate bonding conductor shall be installed in liquidtight flexible conduit in accordance with section 10”
- CEC Rule 10-618 (3) “The armour of flexible metal conduit and liquidtight flexible metal conduit shall not be considered as fulfilling the requirements of a bonding conductor for the purposes of this rule, and a separate bonding conductor shall be run within the conduit”

#### Standard Material

**Lugs:** High conductivity copper (for copper conductor only)

**Body, Gland, Locknut & Ground**

**Cones:** All steel or malleable iron

**Sealing Ring and Insulator:**

All thermoplastic

**Sealing Gasket:** Stainless Steel & Buna N

**Strap:** Steel

#### Standard Finish

All Electro Zinc Plated and Chromate Coated except lugs

**Lugs:** Bright Dipped

#### Range

- 5331GR Series (straight fittings with male hub): 3/8 in. thru 6 in. conduit
  - 5341GR Series (45°): 3/8 in. thru 4 in. conduit
  - 5351GR Series (90°): 3/8 in. thru 4 in. conduit
  - 5271GR Series (straight fittings with female hub): 3/8 in. thru 1-1/4 in. conduit
- All hubs provided with taper pipe threads (NPT)

#### Conformity

38GR-TB	3/8
12GR-TB	1/2
34GR-TB	3/4
1GR-TB	1

The grounding device is a combination of a set screw and a grounding lug that can be used to retrofit any existing liquidtight fitting to an externally grounded version

## Liquidtight Flexible Metal Conduit Fittings

### Specifications — PVC Coated

#### 3321 Series\*

\*3361 Series...same as 3321, except 90°  
3341 Series...same as 3321, except 45°

#### Application

- Used where liquidtight flexible metal conduit is installed in outdoor or indoor locations where exposed to environmental conditions that are more than normally corrosive to exposed surfaces
- To positively bond conduit to box or enclosure

#### Features

- PVC coated to protect fitting from extremely corrosive surroundings without affecting integrity of electrical grounding path (A)
- Provided with overlapping sleeve for additional seal (B)
- Ability to install quickly with low torque effort
- Ground cone design offers following advantages:
  - (i) Compresses metallic convolutions; provides high quality ground contact with low impedance and high raceway holding power (C)
  - (ii) Single helical thread on ground cone is easy to install without cross threading; accepts variations in raceway diameters and convolution pitch (D)
  - (iii) Rolled over edge protects conductors (E)
- Sealing ring design has following exclusive features:
  - (1) Grips and seals at leading and trailing edge—will not abrade raceway jacket (F)
  - (2) Provided with grooves on inside diameter for anti-sleeving (G)
  - (3) Shoulders on both ends for extra sealing
  - (4) Symmetrical shape assures foolproof assembly
- Hardened steel or malleable iron locknut (H)
- Can be disconnected and reused
- Watertight/oiltight installation at box or enclosure termination is provided by external taper thread hub and sealing gasket (I)
- Conforms with JIC requirements

#### Standard Material

##### Body, Gland, Locknut and Ground Cones:

All steel or malleable iron

##### Sealing Ring and Insulator:

All thermoplastic

##### Sealing Gasket, Retainer: Stainless Steel

##### Resilient Seal: Buna N

##### Coating: PVC

#### Standard Finish

##### Outside of body and gland:

PVC Coated 0.040 min. Thickness

##### Inside of body and gland:

Electro Zinc Plated and Chromate Coated

##### Locknut, Sealing Gasket, and Retainer:

Electro Zinc Plated and Chromate Coated

#### Range

- 3321, 3361 and 3341 Series  
3/8 in. thru 4 in. conduit

All hubs provided with taper pipe threads (NPT).

## Liquidtight Flexible Metal Conduit Fittings

### Specifications — Liquidtight Union for Threaded Hub

41 Series

#### Application

- To couple threaded end of a fitting or a pipe to a tapped opening in a box or enclosure where rotation of fitting or pipe is limited or restricted

#### Features

- Provides high quality bond between fitting or pipe to the union
- Provided with resilient seal (A)
- Resilient seal subjected to controlled deformation; positive seal and reusability are assured (B)
- Unique design centralizes throat openings of threaded hub and union (C)
- Permits orientation of fitting in any predetermined direction for a safe, functional and neat assembly
- Provided with taper-threaded hub for liquidtight assembly (D)
- Straight pipe threads on gland accept a straight-or taper-threaded hub on fitting or pipe to be coupled (E)
- Suitable for hazardous location use per CEC Rule J18-106 Class I, Div. 1; CEC Rule 18-202 Class II, Div. 1; CEC Rule 18-252 Class II, Div. 2; CEC Rule 18-302 Class III, Div. 1; CEC Rule 18-352 Class III, Div. 2;

#### Standard Material/Finish

- Gland** Steel/Electro Zinc Chromate Coated
- Body** Steel/Electro Zinc Chromate Coated
- 'O' Ring** Buna N/As Molded

- Federal Specification W-F-408
- Federal Specification W-F-406
- Federal Standard H-28 (Threads)

Steel, zinc plated and chromated. Ideal for angle fittings where swing clearance is not available

### Liquidtight Union for Threaded Hub

Cat. No.	Conduit Size (in.)	Dimensions (in.)	
		A	B
41TB	1/2	1-29/64	1
42TB	3/4	1-15/16	1-1/4

## Liquidtight Flexible Metal Conduit Fittings

### 45° Metallic Fittings

Cat. No.	Conduit Size (in.)	Hub Thread	Dimensions (in.)	
			A	B
3730-TB*	3/8	1/2 — 14 NPT	1-5/32	2-13/32
3731-TB	1/2	1/2 — 14 NPT	1-3/8	2-9/16
3732	3/4	3/4 — 14 NPT	1-5/8	3
3733-TB	1	1 — 11-1/2 NPT	1-7/8	3-1/2
3734-TB	1-1/4	1-1/4 — 11-1/2 NPT	2-3/8	4-1/8
3735-TB	1-1/2	1-1/2 — 11-1/2 NPT	2-3/4	4-7/8
3736	2	2 — 11-1/2 NPT	3-17/32	5-1/2

\* Not UL Listed  
CSA not applicable

### 90° Metallic Fittings

Cat. No.	Conduit Size (in.)	Hub Thread	Dimensions (in.)	
			A	B
3740*	3/8	1/2 — 14 NPT	1-5/32	1-5/8
3741	1/2	1/2 — 14 NPT	1-3/8	1-3/4
3742	3/4	3/4 — 14 NPT	1-5/8	2-1/4
3743-TB	1	1 — 11-1/2 NPT	1-7/8	2-9/16
3744-TB	1-1/4	1-1/4 — 11-1/2 NPT	2-3/8	3-1/4
3745	1-1/2	1-1/2 — 11-1/2 NPT	2-3/4	3-1/2
3746-TB	2	2 — 11-1/2 NPT	2-17/32	4-1/8

\* Not UL Listed  
CSA not applicable

NEMA 3R, 4, 6 & 13

Temperature range — -30°C to 105°C.

### Liquidtight K.O. Plugs

Cat. No.	Size (in.)	Dimensions (in.)
		A
5710	1/2	1-9/32
5711	3/4	1-1/2
5712	1	1-27/32
5713	1-1/4	27/32
5714	1-1/2	2-1/2
5715	2	3-3/32
5716	2-1/2	3-21/32
5717	3	4-19/64
5718	4	5-19/64

UL Listed liquidtight  
CSA not applicable  
Meets Coast Guard Regulation CG293

## Liquidtight Flexible Metal Conduit Fittings

### Specifications — Liquidtight Sealing Gaskets

5262 Series

#### Application

- When used with an externally threaded fitting provides a tight seal against oil, fumes or moisture at the knockout opening

#### Features

- Locks resilient sealing material in steel.
- Steel retainer protects seal from extruding out under torque and limits compression to an optimum predetermined value; provides high quality seal
- Resilient material flows and seals rough surfaces

#### Standard Material

**Retainer** Stainless Steel

**Sealing Material** Buna N

#### Range

- 1/2 in. thru 4 in. Hub Size

NEMA 3R, 4, 6 & 13

For use with T&B® Fittings. Sealing material resists oil, coolants, and hydraulic fluids as well as water

### Sealing Ring with Stainless Steel Retainer

Cat. No.	Conduit Size (in.)	Dimensions (in.)	
		A	B
5299**	1/4	0.80	0.11
5261**	3/8	0.95	0.11
