Features	Specially designed for easy installation, Eaton's BR 1-inch load
	centers house the branch circuit breakers and the wiring required
	to distribute power to individual circuits. They serve as main
	breaker for service entrances or as main lug when adding circuits
	to existing service. The main breaker protects the entire panel
	and can be used as a service disconnect. The branch breakers
	protect the wires leading to individual electrical loads such as
	fixtures and outlets.
