Power-Sonic SLA Battery Chargers

The chargers listed below are "switching" type devices which operate without the use of transformers. They control and regulate current and voltage and automatically switch from the higher fast charge voltage to the lower float voltage when batteries are very close to being fully charged. At the float voltage, it is safe to leave the battery connected to the charger indefinetly, making charging pretty much fool-proof.

Battery Sitter

The Battery Sitter charges, desulfates, tests and maintains all conventional, AGM, and Gell type batteries from 2.5Ah to 32Ah capacity (PS, PSH and Power-Sport). All major starter battery manufacturers recommend maintaining starter batteries FULLY CHARGED during periods of non-use. The battery sitter is automatic and totally safe for months long connection during off season. DO NOT USE ON BATTERIES WITH AMP RATINGS HIGHER THAN 32 AMPS.

INTRODUCING THE 3AA PROPOLYMER® DUALIE®

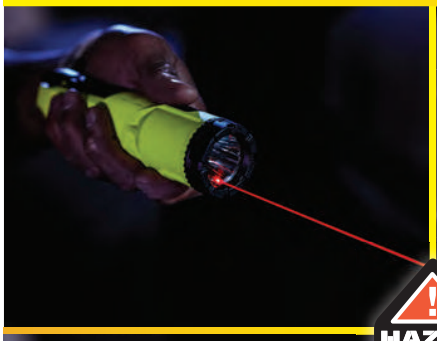

©2015 STREAMLIGHT, INC.

HAZ-LO DIVISION 1 LIGHTING

ONE LIGHT, TWO BEAMS

The intrinsically safe 3AA ProPolymer® Dualie® provides multi-directional lighting. The long-reaching, 171 meter spot beam illuminates with 150 lumens, and combines for a total of 245 lumens when used with the wide flood light. Intuitive activation allows you to use beams independently or together.

AND THE DUALIE® LASER.

With long-reaching spot and laser beam.

HAZ-LO DIVISION 1 LIGHTING

For pinpoint accuracy, there is also the 3AA ProPolymer® Dualie® Laser. Both lights are safety-rated for use in Class I, Div. 1 environments faced by many industrial workers.

MARK "MEL" MELCHING

1960-2015

Our friend, Mel, passed away September 10, 2015 after a long fight with pancreatic cancer. He is survived by his wife, Shannon, and three children. Mel was our friend since childhood, but became part of our family when he joined our company in 1999. He will forever be missed.

Power-Sonic SLA Battery Chargers

The chargers listed below are "switching" type devices which operate without the use of transformers. They control and regulate current and voltage and automatically switch from the higher fast charge voltage to the lower float voltage when batteries are very close to being fully charged. At the float voltage, it is safe to leave the battery connected to the charger indefinetly, making charging pretty much fool-proof.

Battery Sitter

The Battery Sitter charges, desulfates, tests and maintains all conventional, AGM, and Gell type batteries from 2.5Ah to 32Ah capacity (PS, PSH and Power-Sport). All major starter battery manufacturers recommend maintaining starter batteries FULLY CHARGED during periods of non-use. The battery sitter is automatic and totally safe for months long connection during off season. DO NOT USE ON BATTERIES WITH AMP RATINGS HIGHER THAN 32 AMPS.

INTRODUCING THE 3AA PROPOLYMER® DUALIE®

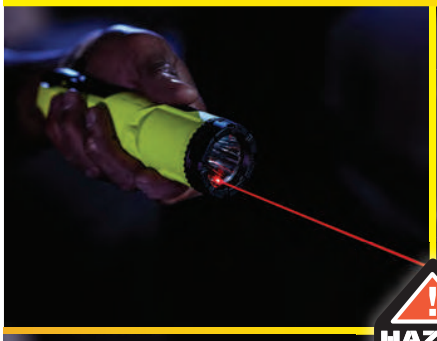

©2015 STREAMLIGHT, INC.

HAZ-LO DIVISION 1 LIGHTING

ONE LIGHT, TWO BEAMS

The intrinsically safe 3AA ProPolymer® Dualie® provides multi-directional lighting. The long-reaching, 171 meter spot beam illuminates with 150 lumens, and combines for a total of 245 lumens when used with the wide flood light. Intuitive activation allows you to use beams independently or together.

AND THE DUALIE® LASER.

With long-reaching spot and laser beam.

HAZ-LO DIVISION 1 LIGHTING

For pinpoint accuracy, there is also the 3AA ProPolymer® Dualie® Laser. Both lights are safety-rated for use in Class I, Div. 1 environments faced by many industrial workers.
