FIVE MINUTE installation with SINGLE Hole Saw • Low Profile Covers

Arlington's LISTED **DROP IN™** Floor Box Kits are the fastest way to install a BOX nearly flush in an EXISTING floor.

Designed for flush, neat installations and TIME-SAVINGS these floor boxes install with a SINGLE hole saw and sit just 1/8" off the floor!

DROPIN box accommodates most 3.5" standard covers, but Arlington's round **low profile** covers seat flush into the non-metallic ring, reducing trip hazards.

- BRASS OR NICKEL-PLATED BRASS Metal Covers have two gasketed flip lids that keep water out and protect the box.

Fastest box installation!

1 Determine box location, taking care to avoid structural framing members. Using hole saw cut 4-1/4" diameter opening through floor and subfloor.

2 Insert mounting bracket. Using indicator marks align bracket for proper receptacle orientation. Tighten (3) wing screws to secure bracket to floor.

Non-metallic Blank Covers

DROPIN kits are also available with **NON-METALLIC Blank Covers**. They're perfect for covering unused receptacles. To use the receptacle simply remove the blank cover.

- Five decorator colors: dark brown, light almond, gray, caramel, black – each with a matching non-metallic mounting bracket, gasket and carpet ring.

3 Pull cable. Install in box with supplied cable connector. Attach box to bracket with (3) #8 x 1/2" sheet metal screws (supplied) through the U-shaped cut outs in the box flange.

4 Wire receptacle. Install in box. Attach supplied gasket support plate to receptacle with #6 x 1/2" screw.

Cover Installation
Install gasket. Attach metal or non-metallic blank cover to box with (3) #8 x 1/2" flathead machine screws. *When using the in-use non-metallic cover, substitute the colored in-use plate for the black gasket support plate.*
