EASY TO INSTALL CONCRETE BOXES

- 1 Set concrete floor box into position. Secure in place through molded mounting ears. Option: Use 1/4-20 screws to level/position the box.
- 2 Install conduit as needed using PVC cement. Pull wires through conduit as required.
- 3 Install plugs (provided) w/ PVC cement to seal unused openings.
- 4 Install pour cap. Pour concrete to finished depth.
- 5 After concrete has cured, remove pour cap. Use a saw to cut box to finished floor height.

Complete the installation with a leveling ring and one of these cover trim kits.
