

JOURNEYMAN™

CRIMPING/CUTTING TOOL

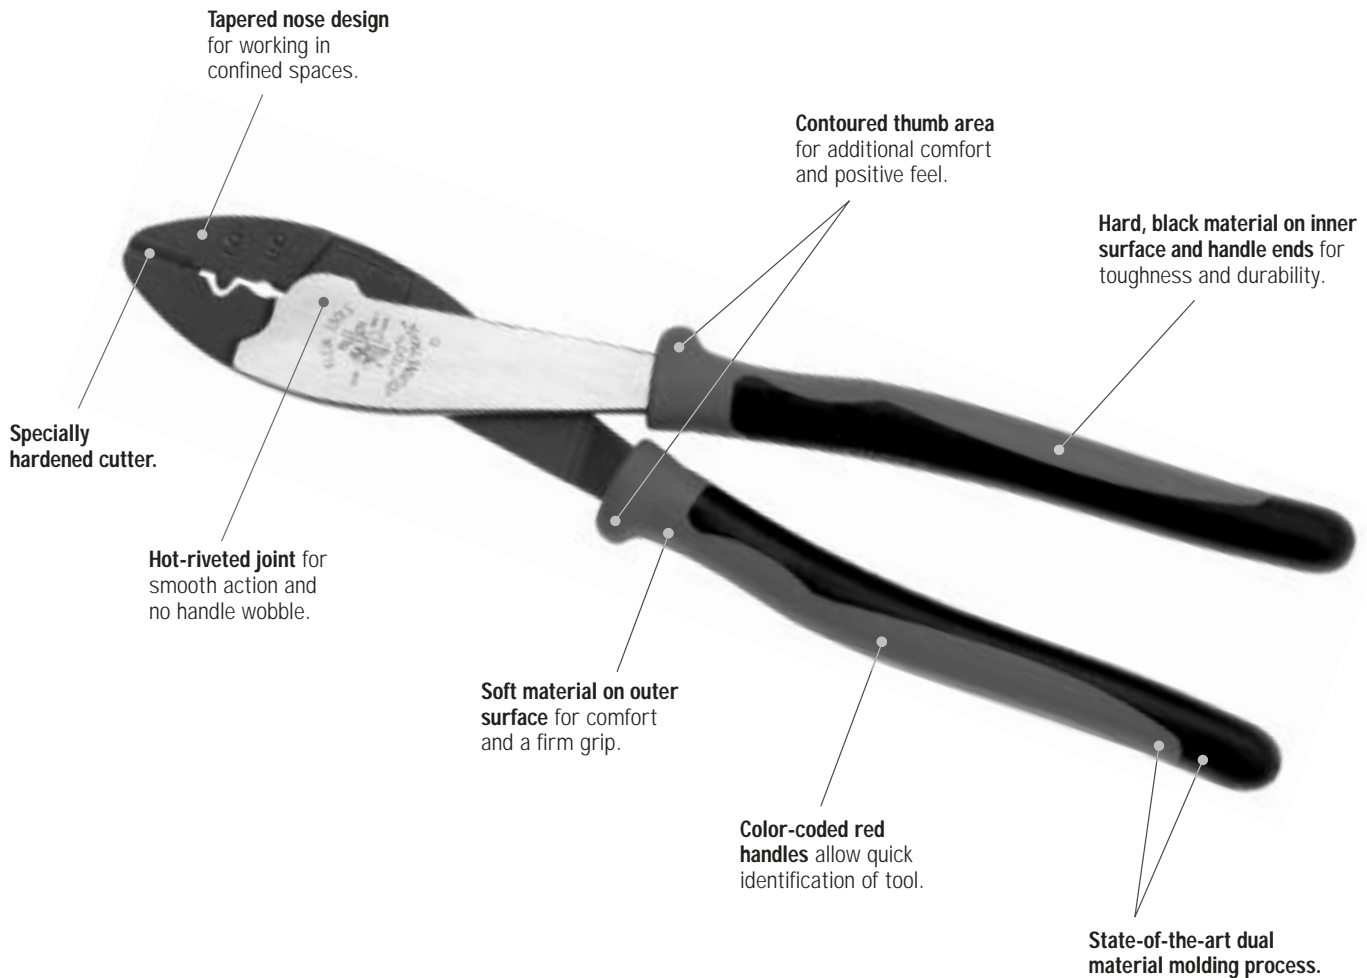

**KLEIN
TOOLS**

Klein's Journeyman Crimping/Cutting Tool... Get a Hold on Comfort and Durability

Introducing Klein's new Journeyman™ crimping/cutting tool, which is designed to crimp insulated and non-insulated 10 to 22 AWG solderless terminals and connectors. Easy-to-read tool markings identify the insulated or non-insulated crimping dies, and a tapered nose design is ideal for working in confined spaces. The tool also has a specially-hardened cutter in the nose. For comfort and durability, the state-of-the-art handles are made from a dual material molding that allows for a softer, more comfortable grip on the outer surface and a harder, more durable grip on the inner surface and handle ends. See and feel the difference of a Klein Journeyman, and you will know why "professionals are known by the tools they own™".

Features

▲ WARNINGS:

- Always wear approved eye protection.
- NOT insulated. Plastic-dipped or slip-on plastic handles are NOT intended for protection against electrical shock.
