

SWITCH BUTTON KITS AND SWITCH BUTTON ENGRAVING

| LVSW-KITS

Field replaceable buttons for LVSW-100 Series Low Voltage Switches

Available for 1-, 2-, 3-, 4- and 8-button wall switches

Choice of white, light almond, ivory, grey and black; includes matching trim ring for complete color change

Customized engraving option

Button kits snap onto existing switches without tools for fast, easy color update or personalization

Ideal for switch labeling, building remodeling, or repurposing of controls

Description

The LVSW-KIT-100 Series are replacement button trim color kits that are compatible with all LVSW-100 Series Low Voltage Switches. They are available with or without custom engraving.

Operation

The button kits can be easily installed without removing the switch from the wall. With the wall plate off, the installer simply presses gently on each side of the existing buttons and pulls the trim ring off, followed by the buttons, which are part of a single unit. The new button unit replaces the old one, and the new trim ring snaps on to hold the buttons in place.

Features

- Kits available for all LVSW-100 Series Low Voltage Wall Switches
- Five color options
- Optional engraving with custom text
- Easy to install in the field without removing the switch from the wall
- The product meets the materials restrictions of RoHS

Engraved Button Labels

If labeled buttons are required, complete an order form for custom engraving. Each button can be custom-engraved with exacting detail, using indelible ink applied by a high speed laser etching machine. Full-width button labels for 1-, 2-, 3-, and 4-button switches may include up to fifteen characters. Half-width button labels for 8-button switches may include up to seven characters.

Applications

LVSW button kits are ideal for changing the appearance of a switch as part of a remodel or new decoration scheme, or because of damage. Engraved button kits provide an easy, professional-style solution to personalizing switches for any application. Button labels typically comprise the name of the controlled lights or the purpose of the lighting scene (e.g. sconces, downlights and wallwashers, or meeting, AV and whiteboard).
