## how to construct a wallplate model number

use the following steps to order multi-gang, metal, and replacement wallplates

### 1 product code

**NT**

thin profile (0.3" or 7.6mm d)

Vareo®

NovaT☆®

architectural accessories

GRAFIK Eye®  
seeTouch® wallstation

**N**

wide profile (0.65" or 16.5mm d)

Nova®

When ganging products together under a common wallplate the product's depth must be the same style (NT or N).

### 2 insert code(s)

insert

The detachable face of the product is called an insert. Each product has its own Insert Code, see pages 48-49 for a complete listing of model numbers and their insert codes.

Select Insert Codes and add to model numbers in left to right order as if looking at the front of the wallplate (see example at the bottom of this page).

Inserts used in a fins broken application.  
From left to right:  
NovaT☆® (small control)  
Vareo® (small control)  
NovaT☆® (large control)

**NT-SOL-FB-WH**

**NT-SOL-FB-WH**

## 3 ganging code

### FB

fins broken

### NFB

no fins broken

mixing small and large controls

**correct:** group small and large at either end

4.5" required for vertical installations

**incorrect:** do not alternate small and large

Determine whether controls need to use maximum load capacity or can be derated. Derating is the reduction of the maximum capacity (load) a unit can reliably handle when fins/side sections are removed. A scored section along each side of the mounting plate/fin is designed to be removed to facilitate ganging.

See page 183 for more information about your specific product's derated capacities. Note: If **any** controls are ganged under the same wallplate with no fins broken, then the ganging code is NFB.
