

**Stock #: RT50**

**Product Description:**

1/2" compression connectors are used in dry locations to bond 1/2" unthreaded rigid or IMC conduits to electrical junction boxes or electrical enclosures. Steel compression connectors provide concrete tight connections when taped. Garvin Industries' heavy gauge steel construction maintains mechanical protection and solid grounding of the conduit to the designated electrical junction box or enclosure. They eliminate the need to thread bald conduits to attach them to electrical junction boxes or enclosures. Compression connectors are zinc electroplated for excellent corrosion protection in damp locations.

**Product Specifications:**

Size : 1/2"

Compliance : CUL,UL
