

Stock #: UBL1-RED

Product Description:

As an installer, you know that though a circuit breaker lock is small, it is also mighty; preventing locks from slipping off the breaker and disrupting power flow throughout a building. You also know that there are as many circuit breakers as there are circuit breaker locks; and it's your job to have the proper tool at all times. Thanks to Garvin Industries, your job just got a whole lot easier. Garvin Industries' universal breaker lockout is designed to work with every major circuit breaker on the market. Where you used to have to make costly and time consuming trips to find the right lock for the right panel, you now have the one tool you need at all times. Painted red to meet NFPA-72, Garvin Industries' patented corrosion-resistant circuit breaker lock is corrosion resistant, easy to install, and guaranteed for life.
